

**About the establishment of Doctor's Course
at Graduate School of Interdisciplinary Science and Engineering in Health Systems
in year 2018**

Okayama University is planning to establish Graduate School of Interdisciplinary Science and Engineering in Health Systems on April, 2018. (The name of the degree will be awarded in the new graduate school is "Doctor of Philosophy, PhD"). When the establishment is approved, Division of Medical Bioengineering of Graduate School of Natural Science and Technology and part of the other graduate schools of Okayama University will change to Graduate School of Interdisciplinary Science and Engineering in Health Systems.

The plan is currently pending, and those who have passed Division of Medical Bioengineering at the entrance examination to be conducted at Graduate School of Natural Science and Technology will be enrolled in each major of Graduate School of Interdisciplinary Science and Engineering in Health Systems when the establishment of Graduate School of Interdisciplinary Science and Engineering in Health Systems is approved. Therefore, all applicants who wish to take the entrance examination should fully understand and cooperate on this matter, and also please consult a prospective supervisor including the research plan well enough before applying.

Note: The content after the reorganization is a schedule, there may be changes, such as the name.
